

## Structural Dynamics Lab (TNO)

*Shock testing*

- Horizontal shock table (10000 kg payload, 10-450 m/s<sup>2</sup> acceleration);
- Large vertical shock table (3000 kg payload, 100-4000 m/s<sup>2</sup> acceleration);
- Small vertical shock table (300 kg payload, 100-5000 m/s<sup>2</sup> acceleration);
